Portfolio: artfolio-ai.onrender.com | New Delhi, India (open to relocating to Kolkata)

2 October 2026

Dear Hiring Manager,

I am a Senior Graphic Designer and Creative Technologist with more than twenty years in print, publishing and pre-press production. I am writing to explore roles where strong layout and production skills meet workflow automation — Creative Technologist, Design Tech Lead or senior publishing design positions.

Most of my career has been spent producing books, magazines and K-12 educational content for international publishers, including Oxford, Cambridge, Pearson, Wiley, HarperCollins, Scholastic and British Council. I use Adobe InDesign, Photoshop and Illustrator every day, and I care about the details that decide whether a file prints right the first time: style sheets, typography, colour, bleed and preflight.

Alongside production work, I build the tools that make it faster. I have written 72 automation tools in Python and InDesign ExtendScript, which cut our team's turnaround on repetitive pre-press tasks by 20–40%. I also built FlowDesk, a Node.js production management platform with job tracking, QC workflows and a client portal. I enjoy working with production teams to find the slow, repetitive steps and remove them.

I work independently across several projects at once without losing consistency, and I am comfortable leading and supporting a team. I am based in Delhi NCR and open to relocating to Kolkata for the right opportunity.

You can see my work and tools at artfolio-ai.onrender.com. I would welcome the chance to talk about how I could help your team.

Kind regards,

Indrajit Mukherjee

Creative Technologist | Senior Graphic Designer
